## SENIOR FRONTEND DEVELOPER (m/w/d)

### YOUR PROFILE

You work independently, proactively and take over responsibility. You welcome a dynamically changing and solution-oriented working environment. You rise up to new challenges and inspire a “roll up your sleeves” attitude.

### YOUR SKILLS

We are looking for all-around hands-on talent and credible experience in:

- Web tech: Vue, Angular, PHP, Node, ...
- UX and UI: Graphics, design, CSS, ...
- Simple, automatable, and maintainable software architectures
- Performance optimizations

### YOUR TASKS

You will be responsible for the internal and external frontend development of all our web facing activities.

- Supervise and improve UX and UI
- Integrate own and 3<sup>rd</sup> party APIs
- Rapid prototyping of small web apps & demos
- Interface with backend engineering

## WORKING AT AEDIFION

### WHO WE ARE

Energy efficiency is key to the successful energy transition. Our IoT platform realizes untapped saving potentials in buildings and energy systems using cutting-edge data-driven analysis and control algorithms. Originating from RWTH Aachen University, our interdisciplinary team brings years of research in mechanical engineering and computer science to real-world buildings, plants, and districts. Together, we are actively shaping the energy transition.

### WHY AEDIFION

Because we are a fast growing start-up and the “coolest team on earth”™:

- Find challenging and exciting tasks
- Work in flat hierarchies and small teams in an all-out techy company
- Enjoy the unique Cologne-“Jeföhl”
- Shape the energy transition with us and contribute to a more sustainable future

### HOW TO APPLY

Perfect jobs don't exist, they are made! As goes for new employees. Mail us if you tick some of the required skills and we take it together from there. There's no need for formal letters:

- What excites you about this job?
- Show us your previous software projects.
- What do you still need and want to learn?
- Tell us about your secret super powers.
