

Factsheet

Status 2022-05

aedifion helps to operate buildings sustainably, efficiently and transparently. With the AI-based cloud platform, the energy consumption and operating costs of buildings can be reduced and their sustainability improved. A win-win-win for owners, operators and tenants.

The company combines engineering and information technology expertise in a broad portfolio of solutions and thus specifically targets asset managers and asset owners who want to make their portfolio ESG-compliant quickly and easily.
